## REFERENCES\*

Recently we have completed projects in the G Hotel's Kitchen in Galway, Pool and changing room projects in Clayton Hotels in both Liffey Valley & Co. Cork, The Bar and reception area in the Marlin hotel Stephens Green Dublin, and a floor revamp in the Carrickdale Hotel Co. Louth.

# FLOORING SYSTEMS

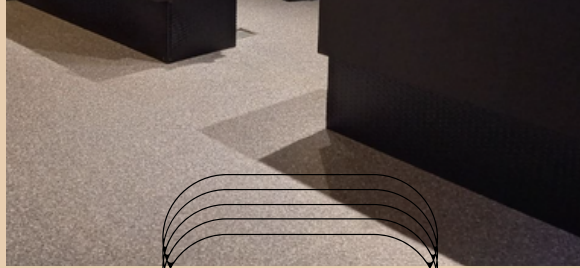

## Decor System

Perfect for a multitude areas the Acrylicon Décor System is a 4mm quartz filled, trowel applied floor coating with excellent slip resistance values, longevity and cleanability. A cove skirting can also be produced and due to AcryliCon's unique ability to chemically bond, it is truly seamless with the floor. The cure time is under 2 hours, meaning any downtime is reduced to a minimum.

## Flake System

The Acrylicon Flake System is 2-3mm thick and encapsulates decorative flakes within its chemically bonded monolithic structure. The system is designed for heavy traffic and moderate industrial use, combining unparalleled longevity with great aesthetics and is available in a multitude of colours. By using our exclusive blend of colour flakes, we are able to provide granite or marble style floors in a fraction of the time normally associated with the traditional systems.

## UNIQUE FEATURES OF OUR FLOOR

- 1. Sanitation:** Acrylicon floors are seamless and non-porous. This is critical in the Fishery industry for infection control. Acrylicon floors are chemically resistant to things such as animal waste and do not allow water, bodily fluids or any other liquid contaminants to seep into the floor structure.
- 2. Temperature Resistant** - we can use temp resistant materials to cater to any area in your hotel.
- 3. Easy to Clean:** The unique 94 newton surface strength is twice as tough as similar floor types, meaning the dirt stays on the surface and is much easier to clean in comparison to other floors. Simply clean down and wet vac to have a clean, hygienic floor each day.

# BENEFITS

Decorative finish - great aesthetics, UV stable and available in a wide range of colours.

2 hours cure time - rapid installation and minimum downtime.

**Anti-Slip:** The highest level of anti-slip to meet new HSA Health and Safety requirement.

High compressive strength - excellent durability and cleanability.

Chemical bond/cure - a truly seamless floor with no cold joints and virtually no risk of delamination.

Low emissions - our products are solvent-free and contain very low VOC's.

Long lasting - our floors do not degrade or become brittle with use.
